

# Sustainability in Public Procurement and Catering Services

## Challenges and solutions for rethinking organics, GPP and food waste

Baltic Sea Region countries' professionals, public authorities and researchers meet virtually to discuss about current policy challenges for sustainability in the public procurement and catering service provision.

The talks deal with systemic issues and local solutions for sustainability, as well as the dynamics for sustainability. So who is responsible for

- providing sustainable diet?
- looking after Green Public Procurement?
- getting rid of food waste?
- introducing organic food into public institutions?
